Example of use:

KL-0039-800 K Hydraulic Drive Set

Field of Application

Designed to complement our mechanical tool sets such as the pulling device for silentbloc **KL-0039-412 K**, **KL-0039-413 K**, wheel bearing tool set **KL-0039-0110 K** or puller series **KL-0174-...** so as to enable them to be driven by the hydraulic cylinder 17 t **KL-0040-2500**.

Due to its special design as a tubular piston cylinder and thanks to the possibility to be used in conjunction with various spindles, the hydraulic cylinder **KL-0040-2500** is suitable for pulling and pushing operations. Even severely seized bearings, bushes or drive shafts can be removed and installed quickly and easily by using this 17t drive kit.

Technical Data

Max. load capacity of the pull spindle M12: 7 t

Max. load capacity of the pull spindle M14: 9 t

Max. load capacity of the pull spindle M20: 20 t

Max. load capacity of the pressure spindle M20: 20 t

Max. load capacity of the hydraulic cylinder: 17 t

Warnings and Notes
