Special Spanner for Cooling Water Cap

PRODUCT DESCRIPTION

KL-0120-6.. - Special spanner for cooling water cap

For quick and easy loosening of stuck radiator water caps on expansion tanks. The precisely fitting special profile prevents damage to the cap. The drive can be operated either via the ½" square socket or by hand.

Current cooling water caps are usually difficult to remove without tools due to their geometrically unfavourable shape, low height and deep seat on the expansion tank.

KL-0120-601 - Special VW spanner for cooling water cap, 7 flats

Universally suitable for radiator caps on VW, Audi, Seat, Skoda, Cupra, also for hybrid and electric models.
